SPONSORSHIP OPPORTUNITIES

Why Sponsor AMPE?

The Annual Marine Propulsion Expo (AMPE) is the only event in North America designed, shaped and focused exclusively on the technical and business interests of marine propulsion professionals. NMPA members and attendees represent approximately 80-100 specialized propeller repair facilities, propulsion experts, manufacturers, and marine service providers who support vessels ranging from recreational boats and center consoles to commercial vessels, tugboats, sportfishing yachts, superyachts, and government fleets.

Every day, these professionals influence purchasing decisions involving:

- Propellers and propulsion systems
- Bearings and shafting components
- Seals and driveline products
- Coatings and corrosion prevention solutions
- Abrasives and shop consumables
- Welding equipment and tooling
- Marine software and digital technologies
- Shipyard and haul-out services
- Boat maintenance and repair products

When vessel owners, captains, shipyards, management companies, dealers, and manufacturers have propulsion questions and issues they need solved, they frequently turn to NMPA members for technical and professional guidance and recommendations for product purchase or service.

Your sponsorship places your company directly in front of the professionals who recommend, specify, purchase, install, service, and influence propulsion-related products throughout North America and beyond.

AMPE is not simply another conference. It is a unique opportunity to connect with our niche industry's most trusted advisors who use and represent your products every day.

Why AMPE Attendees Matter

- Prop shops influence thousands of propulsion-related purchasing decisions annually.
- Members serve recreational, commercial, military, workboat, and superyacht markets.
- Attendees are owners, managers, technicians, engineers, and decision makers.
- NMPA members routinely advise boat owners, captains, shipyards, yacht managers, and manufacturers.
- Sponsors gain access to highly specialized marine professionals difficult to reach through traditional advertising.
- Products demonstrated at AMPE can quickly gain visibility through nationwide shop networks.

"The annual NMPA event brings together a highly focused group of propulsion professionals, shop owners, technicians, and decision makers who understand the details that matter on the water. For Sharrow Marine, it has been an excellent opportunity to have meaningful technical conversations, build strong industry relationships, and create real business opportunities."

- Greg Sharrow, Sharrow Marine
